

USB-004

USB Converter

DUAL PS/2 Keyboard to USB port

The USB-004 Converter is designed to serve as an efficient converter from some peripherals to the newly developed Universal Serial Bus (USB) operating system.

The Universal Serial Bus has been offered as a standard interface for many peripherals on most notebook and desktop PC since 1997.

The USB-004 Converter is the most efficient link between USB and other interfaces for the applications of conventional peripherals.

The USB-004 has two mini-din 6 female ports for connecting two devices of barcode scanner and keyboard/mouse or other peripheral combinations to communicate with host through single USB port simultaneously.

Optional versions, such as RS-232 to USB converter and Mac. Keyboard Wedge to USB converter, are upon request.

- Easy-to-Use
- Low Cost
- Power Support from Host
- Multi-functional

Installation:

1. Plug one or two devices of barcode scanner/keyboard/mouse or other peripherals to the female mini-din port of USB-004.
2. Plug the USB cable of USB-004 into the USB port of the host computer.
3. Put the Windows 98 CD into the CD-ROM driver of the host, run the Windows 98 will install the USB driver automatically.

Specifications:

- | | |
|---------------------------|--|
| 1. Operating System | for Windows 98
USB 1.0 Compatible |
| 2. Power Supply | + 5VDC \pm 5% from USB port |
| 3. Power Consumption | < 20mA |
| 4. Cable Type | USB Serial A |
| 5. Weight | 40g |
| 6. Application limitation | Max. 200mA current include devices connected |
| 7. Humidity | 20% RH to 85% RH |
| 8. Temperature | Operating 0°C~50°C
Storage -20°C~60°C |
